Sexual Behaviors

High School Students Who Used A Condom During Last Sexual Intercourse*

Location: West Virginia

Patterns Over Time

We are tracking the prevalence of condom use over time. West Virginia observed a **decrease** from 2003 to 2023.[†]
 The United States observed a **decrease** from 2003 to 2023.^{††}

* Among students who were currently sexually active.

Missing data point indicates that data were not available.

† Overall, the percentage of students reporting this behavior decreased from 2003 to 2023. The direction of the trend line did not change from 2003 to 2023. Any indicated increase or decrease is statistically significant.

†† Overall, the percentage of students reporting this behavior decreased from 2003 to 2023. The direction of the trend line did not change from 2003 to 2023. Any indicated increase or decrease is statistically significant.

[Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]
